Using Visualizations

Visualizations are used to represent data

They are the key presentation medium

- They take values from the dataset
- They have formatting options

Additional visualizations available from the Microsoft Store

Demo

Introduction to Using Visualizations

Demo

Power BI Visualization Overview

Inserting Other Shapes and Images

Useful for

- Static images
- Headings and instructions
- Highlighting
- Buttons

Demo

Inserting other shapes and images

Using Slicers

Slicers provide the ability to focus in on a certain set of data

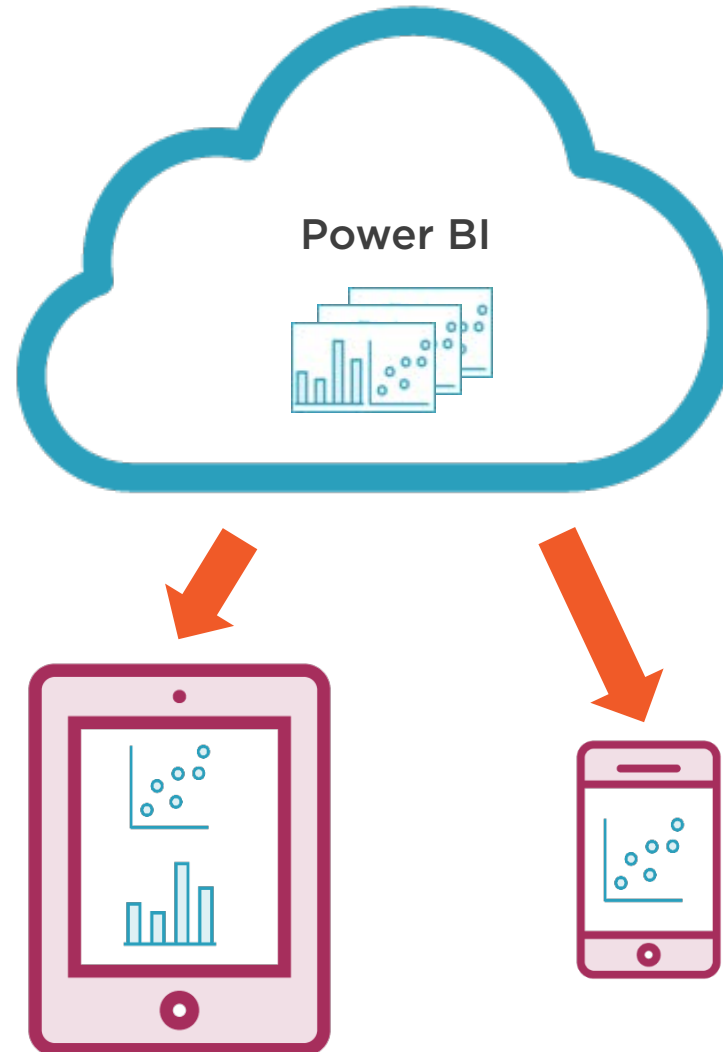

Demo

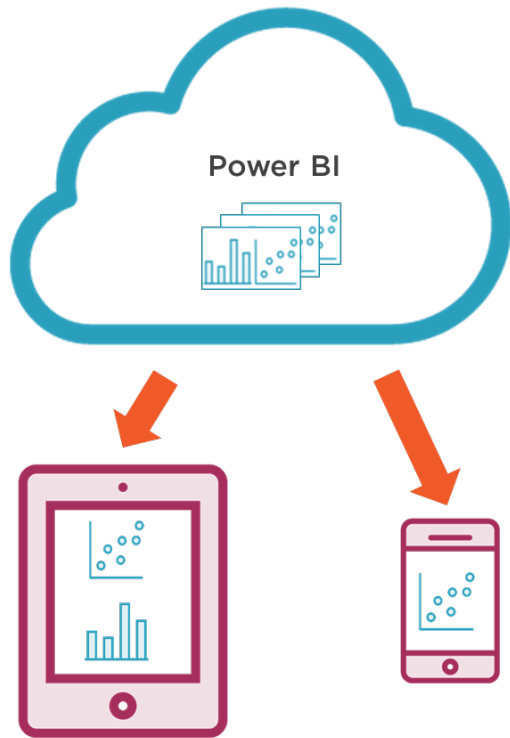

Creating and using slicers

Formatting for Mobile Devices

Formatting for Mobile Devices

Power BI provides a specific phone layout
