

Using Multiple Tabs and Filters to Provide Report Clarity

Ben Howard

TECHNICAL SPECIALIST

@ben_project www.applepark.co.uk

Creating Multiple Pages

Power BI pages are fixed size

Create additional pages to provide more information

- Additional visualizations
- Different focus areas

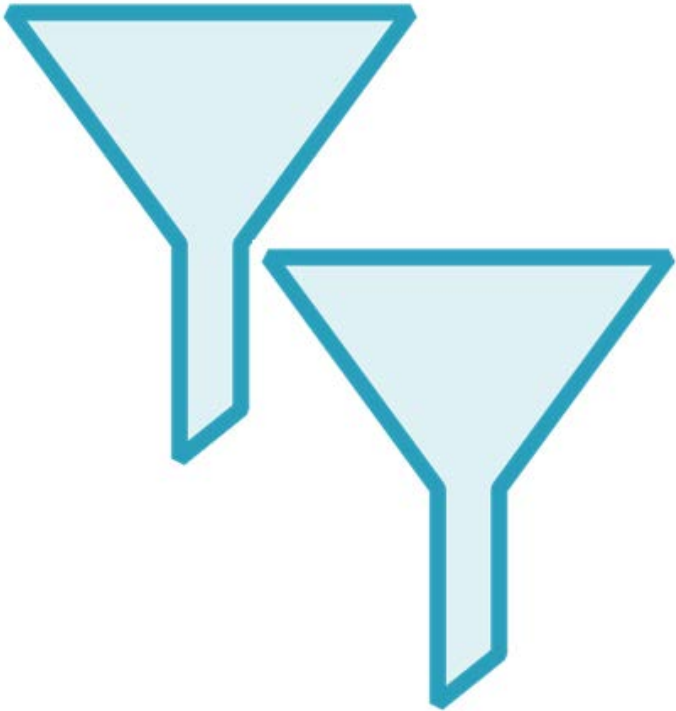

Demo

Creating multiple pages

Using Filters

Visualization filters

- Filter everything on a single visualization

Page filters

- Filter everything on a single page

Report filters

- Filter everything on the whole report

Advanced filtering

- Relative time
- Text based filtering

Demo

Using Visual, Page and Report filters

Drillthrough Filters

Drillthrough filtering allows the user to move from a summary report to a detailed one

It provides the user with focus into a specific item

Demo

Drillthrough filters

Summary

Multiple pages

Visual, Page and Report filters
