Getting Started with Power BI for Business Professionals

Power BI

Very much an introductory course

Aimed at business professionals

- Not a "deep dive" development course!

Aimed for real world scenarios

Enjoy your Power BI journey

Further Help and Learning

www.powerbi.com

- Monthly updates to the Power BI Desktop and powerbi.com

Pluralsight

- Power Query course
- Getting Started with Power BI
- Leveraging Timely On-premises Data with Power BI
- PowerPivot for Excel 2010

More importantly, go right ahead and begin to create your own reports, it's the only real way to learn!

Summary

Understand powerbi.com and the Power BI Desktop

Accessing, cleansing, and merging data

Creating custom columns and date tables

Using visualizations and filters to build reports

Publishing and sharing your reports
